Our Speciality includes

- We fabricate anything and everything out of EPS (Expanded Polystyrene).
- Production of architectural trim for both exterior and interior applications.
- We fabricate large shapes that would otherwise be prohibitive to create in traditional materials.
- Our products enhance your project without adding substantial cost to the project.

Why Expanded Polystyrene (EPS)

- Expanded Polystyrene (EPS) is a lightweight insulator. It is an excellent insulator because it can be used in a variety of construction projects.
- EPS is the ideal choice for old & new building designs because its often lightweight long term benefits.
- EPS is composed of the lightest and most resistant material, performs better in harsh weather, has excellent energy efficiency and facile extrusion means.

<h4>CORNICES</h4> <p>Cornice moulding is generally any horizontal decorative moulding that encloses any building. It can also be used over a door or window. EcoBlock cornices are designed to last for decoration but also functionality.</p>	<h4>ARCHES</h4> <p>Curved structures that spans the opening between two posts or columns.</p>	<h4>MONUMENTS/SIGNS</h4> <p>A monument is a type of structure either explicitly erected to commemorate a person or important event or used as a sign. EcoBlock provides a wide array of unique designs for any occasion.</p>	<h4>COLUMNS</h4> <p>Columns are a very popular product and can dress up a plain entrance. In all any place where you want to demonstrate structure. Columns offered at EcoBlock are straight, tapered, fluted, spiral or rope etc.</p>
<h4>TRIMS</h4> <p>Trim is a kind of decorative moulding, typically around an opening for example windows. EcoBlock offers a wide range of profiles.</p>	<h4>LOUVERS</h4> <p>A louver adds ventilation to your building while creating an appealing aesthetic design. EcoBlock louvers are available either in closed, with vents, or closed so that insects and the like are kept out, while allowing air to flow through.</p>	<h4>BRICK/STONE MOLDINGS</h4> <p>Moulding is a strip of material with various profiles used to cover transitions between surfaces or to decorate. EcoBlock offers the very best of decorative moldings.</p>	<h4>PEDIMENTS</h4> <p>Pediments are often heavily decorated architectural features which are placed on top or either side of a porch or structure. Can also be seen decorating window gables, front porches, and other structures.</p>
<h4>KEYSTONES</h4> <p>EcoBlock keystone comes with many sizes that can be used to accommodate our arches, pediments and window heads. You can choose a pattern of EcoBlock keystone that will blend nicely with your decorative ideas or one that accents the whole house.</p>	<h4>SHUTTERS & LOUVERS</h4> <p>Shutters are usually placed on a window, door or door head indicating the separation between the second and first floor. Anything you look at bands the look great.</p>	<h4>SHUTTERS & LOUVERS</h4> <p>Shutters are usually placed on a window, door or door head indicating the separation between the second and first floor.
